MEMORANDUM FOR: Chief/IP Staff/OPPB

SUBJECT : Evaluation of the USIB File and Program Catalog System

1. I have reviewed the File and Program Catalog and find no entries of interest to DDS activities nor am I aware of any requests for information from the catalog. There are, of course, programs listed which have been or are being used in support of DDS applications, the Time Sharing Monitor (TSMON) for example, but these uses are not related to the catalog entries.

2. We do not plan to submit DDS originated files or programs for catalog listing because they are almost exclusively Agency proprietary, and listing the general type of files and programs which concern us would not appear to be consistent with the overall content of the catalog as presently constituted. For these reasons completion of the questionnaire would not seem to serve a useful purpose.
